

# Carlota Huertas Ruesta

US: +1 (470) 313-5163 | ES: +34 608868374 | [carlota.huertas@gmail.com](mailto:carlota.huertas@gmail.com) | [LinkedIn](#) | [Portfolio](#)

Data Engineer & Analyst specializing in analytics infrastructure, business intelligence, and enterprise data solutions.

## EDUCATION

### Georgia Institute of Technology

**B.S. Industrial and Systems Engineering**, Concentration in Analytics & Data Science

Dec. 2025

GPA: 3.91

#### Minor in Physics

- Recognitions: Matson Supply Chain Scholarship, Dean's List & Faculty Honors, Tower Awards: Gold Sustained.
- International Awards: Angel Herrera Oria Award (Best alumni – Spain), EVAU Madrid Top 5 (13.95/14.0), Madrid Honorific Distinction.
- Languages: Spanish (native), English (fluent), French (intermediate)

## SKILLS

**Data Engineering & Systems:** ETL Pipelines, Data Modeling, Tableau Cloud, Cloud Migration, Data Governance, Identity & Access Management, API Integration.

**Analytics & BI:** Tableau, Power BI, Forecasting, Statistical Modeling, Machine Learning, Experimentation, A/B Testing

**Programming:** Python, SQL, R, Dart

## WORK EXPERIENCE

### Banco Santander International

#### Data Engineer

USA (Remote) | Nov. 2025 – Present

- Architected Tableau Cloud migration infrastructure, designing secure data flows between cloud, Tableau Bridge, and enterprise databases.
- Engineered identity and access controls using SSO, Microsoft Entra ID, and SailPoint to secure enterprise analytics platforms.
- Configured IP allowlists, encrypted database connectivity, and cloud security controls across AWS and Salesforce environments.
- Analyzed datasource dependencies and SQL queries to resolve migration issues and validate data integrity.

#### Digital Strategy Intern

Miami, FL | May. 2025 – Aug. 2025

- Integrated WhatsApp Business via APIs and webhooks, enabling a new client communication channel within the bank's ecosystem.
- Led the integration of Adobe Experience Platform to automate CRM workflows using real-time triggers and unified data architecture.

#### Amazon Robotics — Global Robotics Data Analyst Co-op

Boston, MA | Jan. 2024 – Jun. 2024

- Delivered a 3-year forecasting model and Tableau reporting solution adopted by Global Robotics Operations for strategic planning.
- Developed SQL-based ETL pipelines to centralize supply chain KPIs, improving reporting automation and data accessibility.
- Completed advanced training in analytics and data visualization through the Amazon Robotics Academy.

#### Kaizen Institute — Consulting Intern

Porto, Portugal | Jun. 2023 – Aug. 2023

- Built a macro-enabled Excel tool and Power BI dashboard to streamline operations, reducing lead times by 15% and delays by 233%.
- Analyzed historical data to identify manufacturing bottlenecks and deliver data-driven recommendations to cross-functional stakeholders.

#### Veolia — Research & Development Intern

Paris, France | Jun. 2022 – Aug. 2022

- Developed a strategic roadmap for Digital Twin adoption, evaluating technical feasibility and business impact.
- Built a Python database to track partnerships and research initiatives, enabling data-driven funding decisions.

## PROJECTS

### Tripic – Founder & Engineer | Data-Driven Mobile Platform

Sep. 2025 – Present

Flutter, Supabase, SQL, Data Pipelines, Backend Architecture

- Built a data-driven App addressing a recurring problem within a niche community, using behavioral data to personalize user experiences.
- Developed analytics and recommendation systems that transform user activity into personalized suggestions and decision-support insights.

### Indoor Navigation App (InMaps) – Cofounder & Full-Stack Developer

Jan. 2025 – May 2025

Flutter, BLE Beacons, Sensor Fusion, A\* Search, Pricing Algorithm

- Developed a real-time indoor positioning system achieving 0.41m average accuracy using BLE beacons and sensor fusion.
- Engineered a Python-based pricing algorithm integrated into a production quoting platform for scalable B2B deployment.

### Heart Disease Machine Learning Classification

Aug. 2024 – Dec. 2024

Python, scikit-learn, PCA, Clustering

- PCA, clustering, logistic regression, and SVM models to classify heart disease subtypes across 900+ patient records.
- Achieved 88% classification accuracy and identified key predictive features through dimensionality reduction and model evaluation.

## LEADERSHIP & IMPACT

### Adavi NPO — Teaching Volunteer

Karanai, Gambia

- Taught Math and English in an underserved rural community while supporting school infrastructure initiatives and cross-cultural programs.

### Georgia Institute of Technology — Teaching Assistant & Study Leader (Physics)

Atlanta, GA

- Led analytical problem-solving sessions and tutoring for 350+ students.
- Designed workshops that improved student success rates by 2.5x.

### ALPFA (Association of Latino Professionals For America) — Director of Corporate Relations @GT

Atlanta, GA

- Led corporate partnerships with 20+ companies, aligning recruiting pipelines and professional development initiatives.
- Managed a leadership team to execute sponsorship and networking strategy.

### SHPE (Society of Hispanic Engineers), Atlanta, Georgia

Aug. 2021 – Dec. 2025
